

Internship AI & NLP Engineering

Apply state-of-the-art technology and develop the Next-Gen of Product Management

Next Generation of Product Management – based on AI and Design Thinking!

Pyoneer helps companies to analyse customers feedback powered by AI and NLP to identify product problems or requested features. Based on the feedback the solution predicts an impact score for every product to prioritize the right ideas and features and enabling companies to build products that people really love!

Your Responsibility

Work closely with us on your own project.

- Analyze data and apply smart text classification like topic modelling and sentiment analysis
- Develop and concept a neuronal network to apply machine learning
- Work closely with us on your own project
- Individual or team 📩 your welcome!

Your Experience

- **Python** (advanced experience) and/or AI library frameworks (eg. **Tensorflow**)
- Some experience with natural language processing and artificial intelligence
- Being a **self starter**, enjoy digging into new technologies

WHY JOIN US 🐱

Steep Learning Curve
